About Us

Packet 360 Network head quarter in Delaware State, USA. is a forward-thinking technology company with a long-standing presence in the telecommunications, hospitality, security, and automation industries. Over the decades, we've evolved from a small enterprise into a key player in the market. This growth has empowered us to deliver high-performance solutions backed by a robust product line and comprehensive support. Our reputation is built on delivering exceptional interconnectivity solutions and innovative product designs. We proudly uphold our mission in every solution we provide.

Made in the USA

We are dedicated to delivering high-quality products equipped with advanced features to meet our customers' needs. The majority of our offerings are both designed and manufactured in the United States, while some are designed domestically and assembled at trusted facilities abroad.

QUALITY

Packet 360 products are trusted by industry professionals for their strong performance and exceptional value. We are driven by a commitment to focus, innovation, and continuous improvement in everything we deliver. Each product is rigorously tested to meet the highest standards, including FCC, TIA/EIA, and UL compliance. Our warranty programs reflect the confidence we have in our quality, ensuring that every product not only meets but often exceeds key industry benchmarks such as UL, CSA, and TIA/EIA.

Packet 360 is also a proud member of BICSI, reinforcing our dedication to excellence in communication infrastructure.

INNOVATION

Packet 360 is widely recognized for delivering innovative and reliable solutions to the telecom sector. Through a combination of high-performance products and smart design, we have earned a strong reputation for helping organizations explore the best technology options and build efficient communication infrastructures tailored to their needs.

INDUSTRY ASSOCIATIONS

We are honored to be associated with the following respected organizations and industry groups.

What We Do?

At **Packet 360**, we develop & innovate high quality Infrastructure, Automation & Security products to help you to build your advanced security surveillance system and infrastructure to achieve your objectives.

INFRASTRUCTURE

At **Packet 360**, we develop & innovate high quality Infrastructure, Automation & Security products to help you to build your advanced security surveillance system and infrastructure to achieve your objectives.

DATA CENTER

Packet 360 provides advanced fiber optic and copper cabling solutions that power the data centers of the future. Focused on cost efficiency, quick deployment, and reliable performance, we help organizations build smarter, faster infrastructure.

NETWORK

Our next-generation networking systems are designed for hyperscale environments and ultra-low latency. From public institutions to private enterprises, we provide world-class infrastructure tailored to meet the needs of modern data centers worldwide.

SECURITY

In the realm of security and surveillance, Packet 360 develops advanced video management systems and high-performance surveillance hardware. We prioritize innovation and customer relationships, driven by a creative mindset that helps us consistently deliver reliable, top-quality solutions and support.

AUTOMATION

Our expertise extends to the evolution of smart living. Packet 360 offers a wide range of automation technologies, including access control, hospitality solutions, and smart home integration. We also provide full end-to-end industrial automation design and process enhancement services to streamline operations across industries.

PARKING SOLUTION

When it comes to parking, Packet 360 provides intelligent and scalable management solutions that adapt to any environment. From compact buildings to expansive developments like universities, courts, airports, malls, and sustainable urban spaces, our smart parking systems are built for efficiency, seamless integration, and long-term value.

NDAA☆☆☆☆

**NATIONAL DEFENSE
AUTHORIZATION
ACT**

COMPLIANCE

Packet 360 products are consistently recognized by industry professionals for their exceptional performance and overall value. This reputation comes from our strict quality control practices, which ensure every product is carefully inspected and tested to meet the highest TIA and UL standards. In a market filled with various structured cabling manufacturers, not all take the extra step to have their products independently tested and certified by organizations like Underwriters Laboratories (UL) or ETL. At Packet 360, we believe in delivering verified quality you can trust.

ISO 9001:2015

Packet 360 holds ISO 9001:2015 certification, reflecting our commitment to maintaining the highest standards in quality management. This globally recognized framework ensures our manufacturing and delivery processes are consistently aligned with customer expectations.

EU RoHS

Our products are fully compliant with the European Union's Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU and continue to meet all updates and amendments as they are introduced.

CE

Packet 360 products also carry CE certification, confirming that they meet essential health, safety, and environmental protection requirements set by the European Union for specific product categories.

FCC

We meet the standards set by the FCC under Part 15 Subpart A, which regulates acceptable levels of electromagnetic interference for electronic devices sold in the United States.

NDA A

Packet 360 is proud to confirm that our solutions, including those used by the United States government, the Department of Defense, and affiliated contractors, are fully compliant with NDA A regulations.

TAA

We ensure full compliance with the Trade Agreements Act (TAA), which mandates that products procured by the U.S. Government must originate either from the United States or from designated countries, supporting fair and open international trade.

Worldwide Presence

Packet 360 operates worldwide with a unique blend of global presence and local connection. With a footprint that spans five continents, we stay close to our clients and deliver support on a personal level. Our local representatives understand your language, culture, and needs, making it easier to connect and get the help you need whenever you need it.

Our operations are built around simplicity and customer comfort. With a strong international distribution network, Packet 360 ensures smooth and stress-free transactions. Whether you are making an inquiry, placing an order, receiving goods, or restocking, you can trust that every step is managed with care to provide you with a reliable and satisfying experience.

The Choice of industry Leaders

PRODUCT & SOLUTIONS

INFRASTRUCTURE

Packet **360**

Packet 360 Infrastructure Solutions serve both commercial and residential sectors worldwide, offering a comprehensive range of high-performance passive infrastructure products.

We recognize the need for infrastructure that delivers greater speed, improved scalability, and reduced overall costs. Whether you're managing an enterprise, multi-tenant property, commercial space, service network, or data center, Packet 360 provides complete end-to-end solutions to upgrade your existing setup into a future-ready, seamlessly connected environment.

DATA CENTERS

Packet **360**

From cost optimization and infrastructure consolidation to rapid deployment with zero downtime, **Packet 360** is your go-to partner for overcoming data center challenges.

Whether your data center is cloud-based, on a campus, global, local, commercial, or government-operated, enhancing speed, reliability, and efficiency remains essential. **Packet 360** is dedicated to helping you maintain seamless operations using innovative technologies and future-ready solutions.

We design and manufacture top-tier cabling and connectivity systems, engineered for durability and consistent performance. Every product and complete system is built with precision and backed by exceptional service and support for the entire lifecycle of your network.

Choosing **Packet 360** means investing in reliable technology and gaining peace of mind through a partner committed to long-term value and stability.

NETWORK

Upscale your Wi-Fi to 6.0 – Future, Fast Forward.

From streamlining costs and consolidating infrastructure to ensuring rapid deployment with zero downtime, **Packet 360** is your trusted partner in overcoming data center challenges.

At **Packet 360**, we design and develop next-generation data solutions that support hyperscale environments, ultra-low latency, and fully automated operations to help you reach your business goals. Whether you're a small business or a large enterprise facing growing mobile demands, our network infrastructure offers unmatched performance, enterprise-grade security, and Zero Touch simplicity.

Packet 360's Wi-Fi 6 integrates a wide array of advanced technologies—from professional-grade RF systems and adaptive, scenario-driven antenna arrays to AI-powered learning models and WIS 3.0 for big data optimization. Our proprietary, full-stack network protocol ensures high reliability across every layer of connectivity.

SECURITY

Packet 360

At **Packet 360**, we lead with innovation, specializing in advanced VMS and state-of-the-art surveillance hardware. Your security is our top priority. With a grounded mindset and a forward-thinking approach, our technology, teams, and systems work seamlessly to bring you the confidence and peace of mind you deserve.

We're not just about building products. We're dedicated to building trust through long-term customer relationships, backed by reliable, high-quality solutions and ongoing support provided by our global partner network.

Packet 360 has focused on delivering intelligent, integrated security systems. Our unwavering commitment to quality and reliability has shaped our strong industry reputation and continued growth.

Customers choose **Packet 360** because they trust our experience, depend on our technology, and value our American-made products crafted with precision, performance, and purpose.

AUTOMATION

Packet 360

At **Packet 360**, we recognize the critical role automation plays in modern infrastructure. Whether you're managing an enterprise, manufacturing plant, multi-tenant facility, commercial operation, hotel chain, oil & gas setup, data center, or service network—you need faster performance, greater scalability, improved efficiency, and smooth operations—all at optimized costs.

Packet 360 delivers some of the world's most advanced end-to-end solutions that help transform your operations into a fully connected, intelligent, and future-ready SMART infrastructure. Our systems are designed to be agile, adaptable, and scalable, keeping pace with your evolving needs.

Design excellence is a key reason customers choose our solutions. Beyond aesthetics, our development process prioritizes durability and long product life. Our latest product lineup includes the smallest access control systems, electronic locks, and room automation solutions available today—all engineered for performance and style. Every access reader is fully waterproof and built to withstand extreme temperatures.

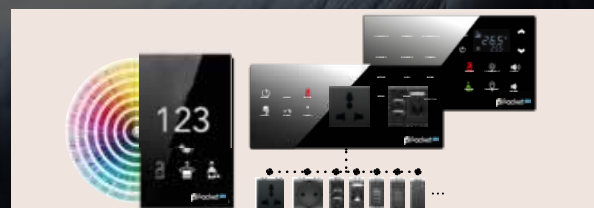

Our team is deeply technical, and continuous product improvement is part of our daily culture. We take pride in the innovation and cutting-edge features built into every solution. If you have specific feature requests or questions about your existing **Packet 360** products, we're always here to help—and eager to listen.

Parking Solutions

Packet 360

Packet 360 introduces breakthrough technology in parking management. Our complete parking solution offers smart guidance and integrated systems tailored for every scale from small buildings to expansive high-density environments such as universities, government offices, courthouses, exhibition centers, hotels, shopping malls, factories, airports, dry docks, public parks, and future-ready sustainable cities.

Our intelligent parking technology is modular, scalable, and cost-effective, allowing easy integration into existing infrastructure. Every **Packet 360** solution is engineered, tested, and built to meet or exceed the most rigorous industry benchmarks. These advanced parking systems operate continuously without the need for manual input, ensuring seamless functionality.

Packet 360 empowers you to modernize, enhance, and expand your current parking setup, delivering a next-generation technological edge. Each project is meticulously planned and customized to ensure optimal performance and unmatched reliability from start to finish. While the concept of quality is widely explored, reliability remains the defining factor and it's where **Packet 360** truly excels.

LIFETIME WARRANTY

What is Lifetime Warranty? A Lifetime Warranty means that products enjoy a warranty within their own practical life. For example, the practical life of transceivers is about 5 years in normal applications, so the lifetime warranty on transceivers would be 5 years.

Qualifications:

Offer lifetime performance limited Warranty with certification and at least one certified designer and installer on staff

1. Must be registered as an Installer prior to installation.
2. Must install Packet 360 category-rated connectivity products, plus Packet 360 horizontal premise cable as an end-to-end Permanent Link solution.

PRODUCT WARRANTY

Warranty Backed By Packet 360

25 Year Performance Warranty

Only Through Packet 360 Installers from end-to-end for 25 years from the date of installation. Coverage includes the replacement of Packet 360 products only.

Qualifications:

Offer 25 years limited Warranty with certification and at least one certified designer and installer on staff.

1. Must be registered as an Installer prior to installation.
2. Must install Packet 360 category-rated connectivity products, plus Packet 360 horizontal premise cable as an end-to-end Permanent Link solution.
